DON'T PANIC! ULTRATONE WILL GET YOU IN THAT PARTY DRESS.

If the Christmas party season's looming but your bikini diet has faded with your holiday tan and you're in a panic about squeezing into those sexy little Christmas party numbers, don't panic, because Ultratone, the leaders in biostimulation body shaping systems have the answer, the FUTURA Plus.

This nifty little technical gizmo is the culmination of over 40 years research and development - but more importantly, it safely and comfortably delivers instant body shaping and reduction results from just one 30-minute session.

It works by using a new Bioptic impulse, which also combines Myo Stimulation, Microcurrents, Ultracell and Ultrasound transmissions, penetrating the skin via stimulation pads that are placed on any problem areas that you want to work on.

What's more, Ultratone is just as effective on the face as it is on the body. So if you've picked up a few stress and worry lines over a hard year, never fear, because a few sessions with one of the many facial anti-ageing; rejuvenating or lifting and toning programmes will make all the difference this party season.

The impulses safely and gently imitate the body's own natural bio-electric energy and emit a series of different waveforms, impulses, amplitudes and frequencies to stimulate, tone, shape and rejuvenate each of the treated areas.

All you need to do is sit back and relax during your treatments - while you meticulously plan this year's mistletoe manoeuvres.
